

# CUSTOM CONTROLS BUILT TO SUIT

## PURPOSE-BUILT, TURN-KEY SOLUTIONS

We tailor each cabinet to the exact specifications unique to your project. Using only the best products from trusted manufacturers, we provide support from design concept to completion.

The New Electric Panel Shop is a CSA and UL Approved Facility that has the knowledge and experience to meet a wide range of control panel requirements, from high volume small dedicated panel to advanced multi-bay enclosures.

When it comes to quality, our standards are beyond rigorous. All wiring and terminals are clearly labeled, devices are centered and all wire ducts are generously sized. All control panels are thoroughly tested before they leave our shop.

We supply a complete set of documentation including BOM, schematics, terminal blocks and panel layouts in CAD or EPLAN format. We will even update or convert your existing drawings.

## PANEL TYPES:

- Junction Termination Boxes
- PLC Panels
- Relay Panels
- VFD Panels & Bypass Panels
- Remote Terminal Units
- Process Control Panels
- Compressor Management Panels
- Pneumatic Panels
- Analyzer Panels
- Motor Controls
- Motor Starters
- Operator Consoles
- GUI Panels
- Protective Relay Panels
- Power Factor Correction Systems
- Softstart Control Panel
- Design Build Controls
- Pre-engineered Products
- SCADA Systems
- Explosion Proof Panels
- Stop/Start Stations
- HMI Panels
- Certified Panels
- Industrial PC's
